

If You Build it, Will they Come?

Ensuring Lasting Use of Data Visualization

Lessons from Project SOAR's GIS
Dashboard for VMMC

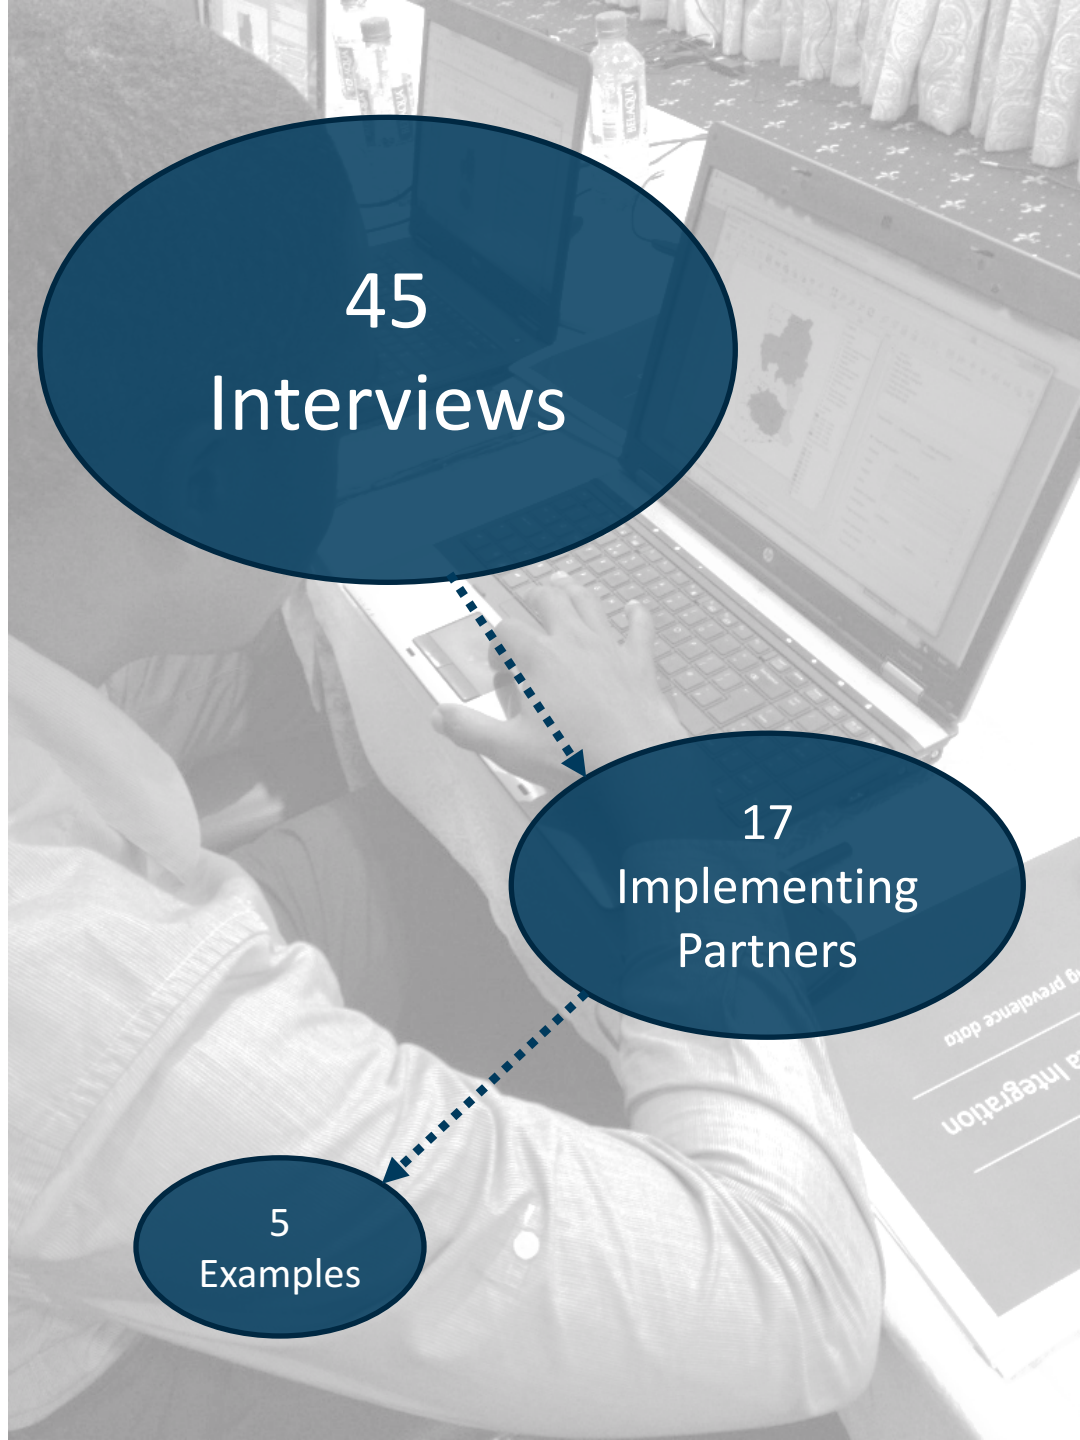

Andrea Vazzano, MPH | Project SOAR, Palladium | March 8, 2017

USAID
FROM THE AMERICAN PEOPLE

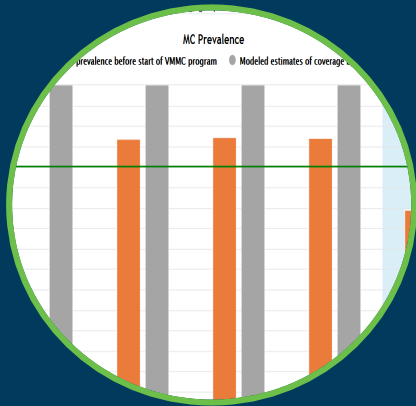

How have data visualizations been used to facilitate HIV program targeting and improvement?

Project SOAR

Suite of Tools to Improve Data for Decision-Making for VMMC Programs

Decision-Maker's Program Planning Toolkit 2.0

Online model estimates cost & epidemiological impact of various scale-up strategies

Site Utilization and Capacity Tool

Provides facility-level information on capacity for VMMC, to guide resource planning

GIS Dashboard for VMMC

Synthesizes and visualizes VMMC data for better program planning and resource allocation

Data Integration

Data Visualization

Thank You

Project SOAR (Cooperative Agreement AID-OAA-14-A-00060) is made possible by the generous support of the American people through the United States Agency for International Development (USAID). The contents of this presentation are the sole responsibility of Project SOAR and Population Council and do not necessarily reflect the views of USAID or the United States Government.

Through operations research, Project SOAR will determine how best to address challenges and gaps that remain in the delivery of HIV and AIDS care and support, treatment, and prevention services. Project SOAR will produce a large, multifaceted body of high-quality evidence to guide the planning and implementation of HIV and AIDS programs and policies. Led by the Population Council, Project SOAR is implemented in collaboration with Avenir Health, Elizabeth Glaser Pediatric AIDS Foundation, Johns Hopkins University, Palladium, and The University of North Carolina.
