The following questions ask about your opinion on the best source of treatment for FEVER. I will read a number of statements to you. After I read each statement, I would like you to tell me which treatment source is the best answer. The treatment sources are: Government health facilities; Mission health facilities and clinics; private pharmacies, chemist or patent medicine vendors; private hospitals and clinics; community health workers; traditional healers/herbalists, and shops/market stalls. You can choose more than one treatment source for each statement or indicate that all sources are equally good. If you are unsure about which response to give to a question, the first response you think of is often the best one.
